

Assembly Instructions for Trade Show Display Packages

EZ Tube Frame Assembly

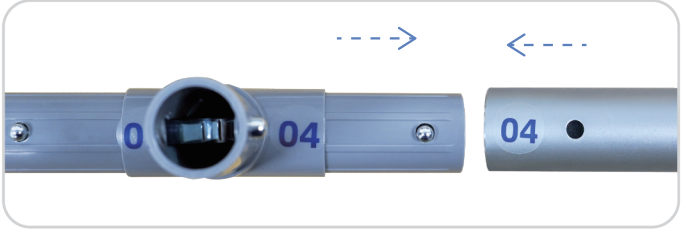

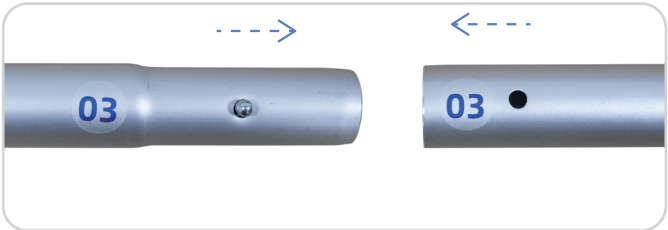

Assemble Elastic-Cord Tubes

- Align the ends of the tubes.
- Insert them until the snap-in button clicks securely into place.

Connect Numbered Tubes

- Match the numbers (e.g., 1 to 1, 2 to 2).
- Push each tube in until the snap-in button locks into place.

Attach Foot Plate

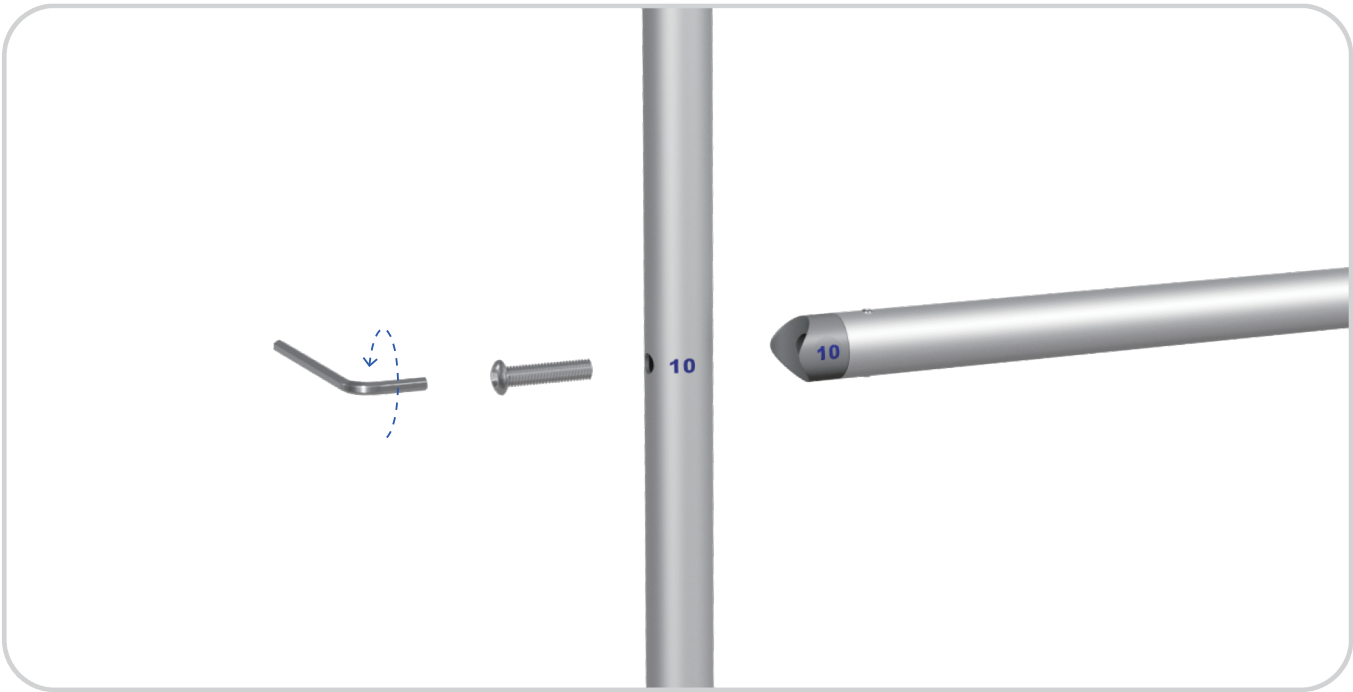

Use the hex wrench and screws provided in the packaging to assemble the foot plate. Once the plate is assembled, connect it to the frame.

Install Support Poles

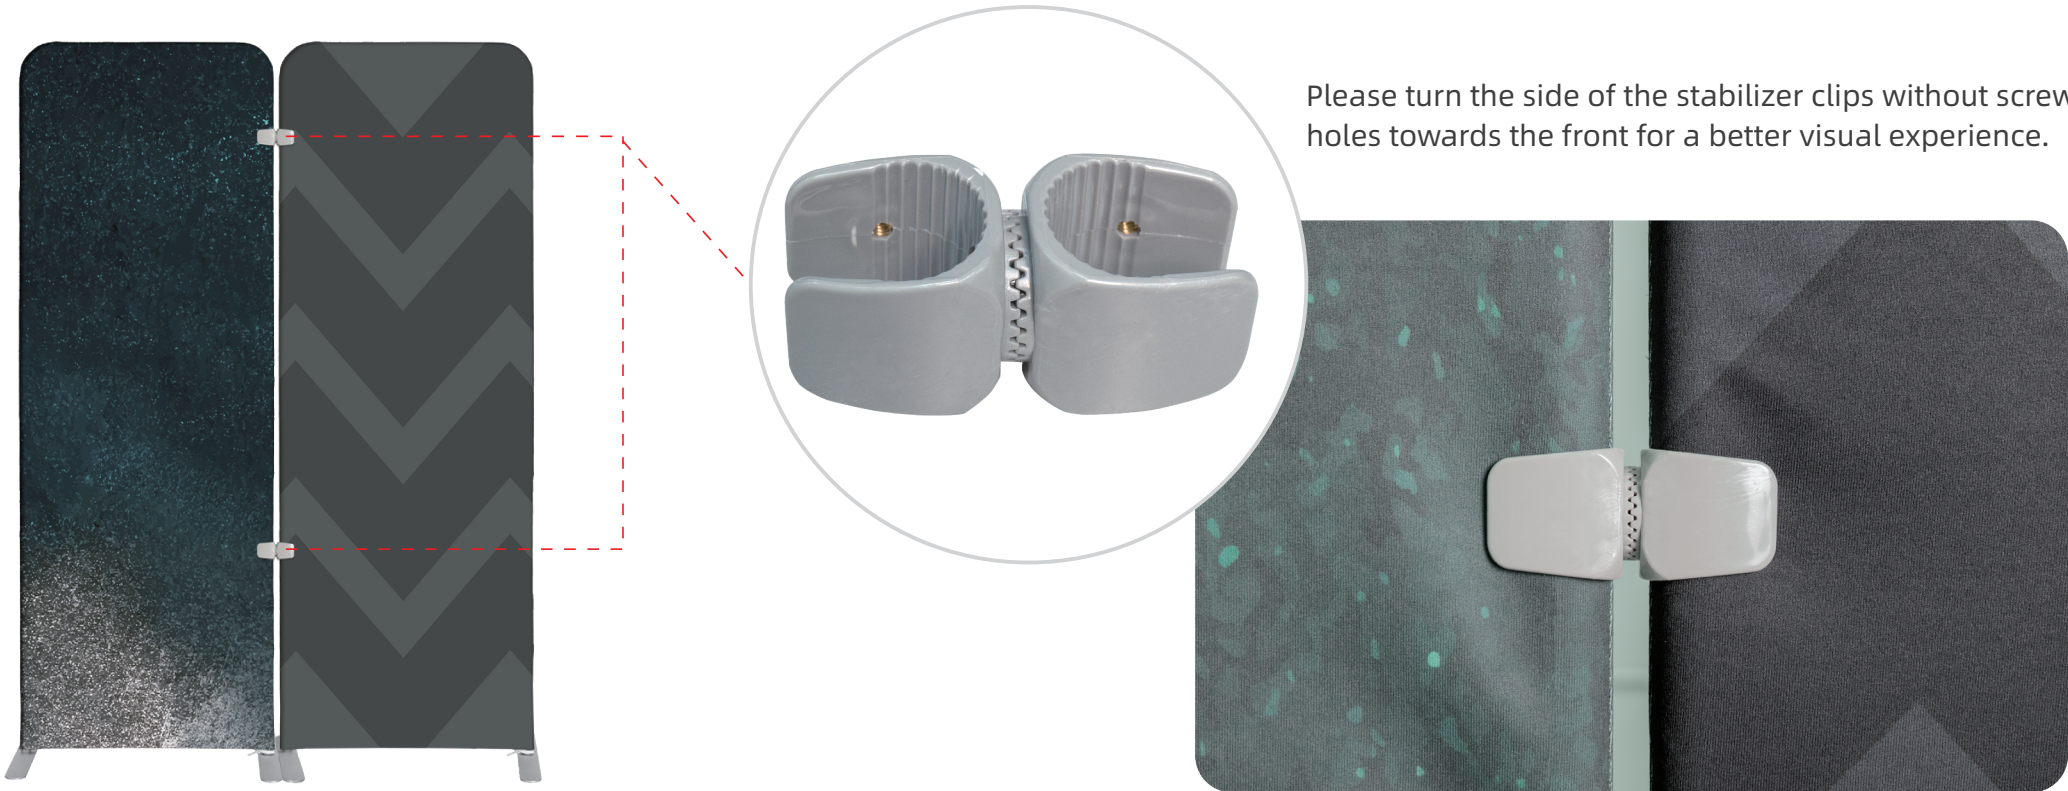

Support poles are also labeled with numbers and provide extra stability to the frame.

- First, unscrew the bolt from the end of the support pole with provided wrench.
- Align the pole with its mounting hole on the frame.
- Insert the bolt through the hole and screw it back into the pole to fasten it securely.

How to Connect Two Banner Stands or Backdrops

Effortlessly link two banner stands or backdrops with stabilizer clips for a seamless, stable extension.

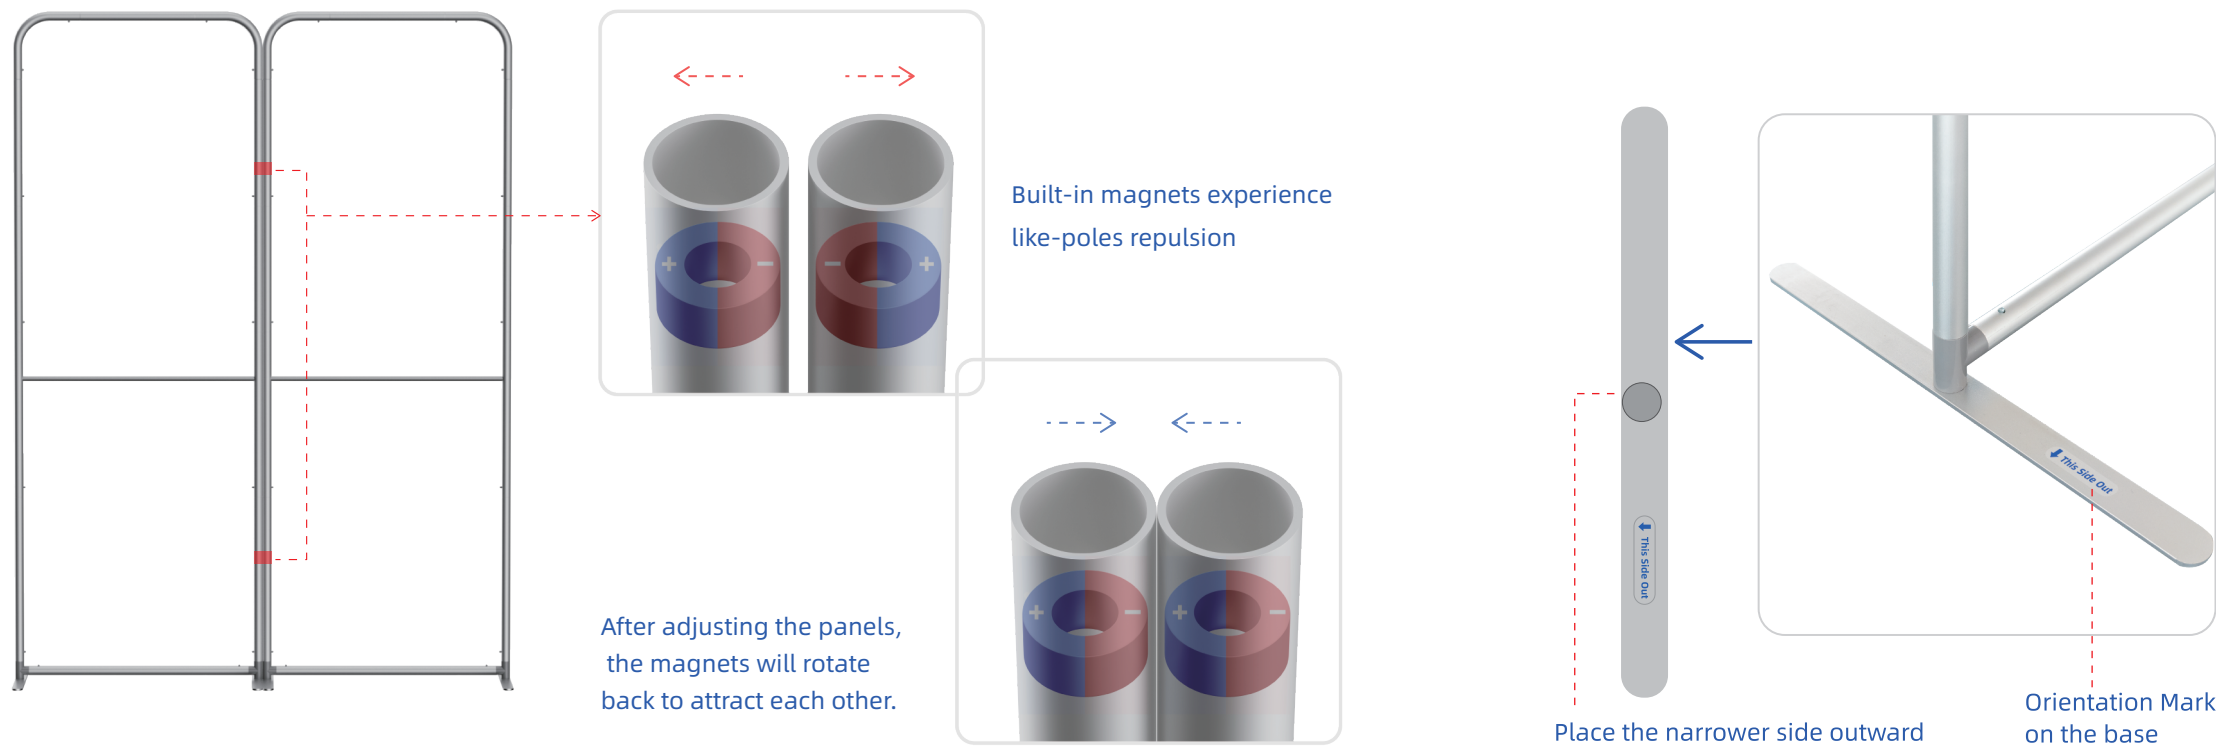

Assembly Instructions for Trade Show Display Packages

How to Connect Two Magnetic Banner Stands

When connecting two magnetic banner stands, simply align the stands, and they will magnetically connect. If you experience like-pole repulsion from the built-in magnets, repeatedly shake or bump the panels to allow the magnets to adjust and align with opposite poles, ensuring a secure connection to complete the assembly.

Please make sure the leg bases are facing the correct direction. If not, the panels will not connect securely. Rotate the foot plates so that the side marked with an arrow and labeled “This Side Out” face each other for proper alignment.

*** Arrow Direction = Outward Facing Side**

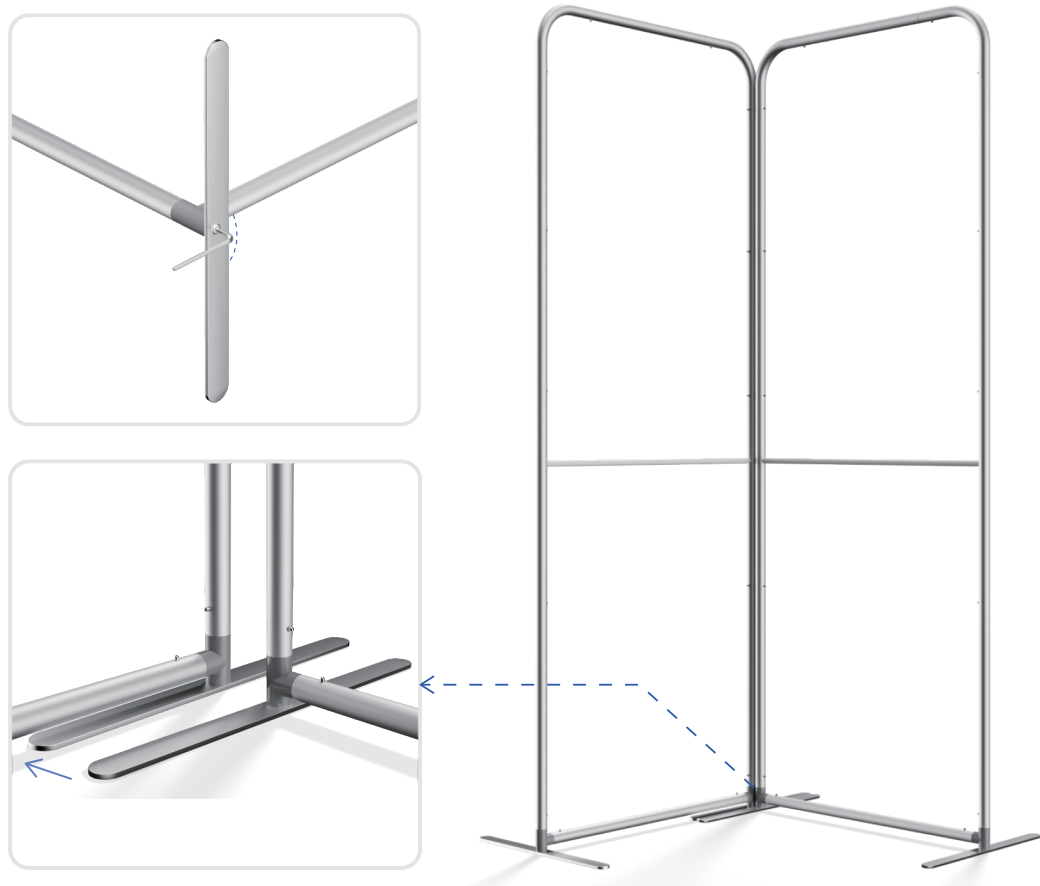

Curved Connection

When combine the maglock panels for a modular display, it's important to adjust the angles of the foot plates to ensure optimal stability and achieve the perfect display effect.

90° Connection

When two maglock panels are connected at a 90° angle, the foot plate of one panel must be rotated to 0° to align parallel with the foot plate of the other panel.

How to Attach the Modular Table

If you get a modular table in your trade show booth kit, please follow the steps below to install it.

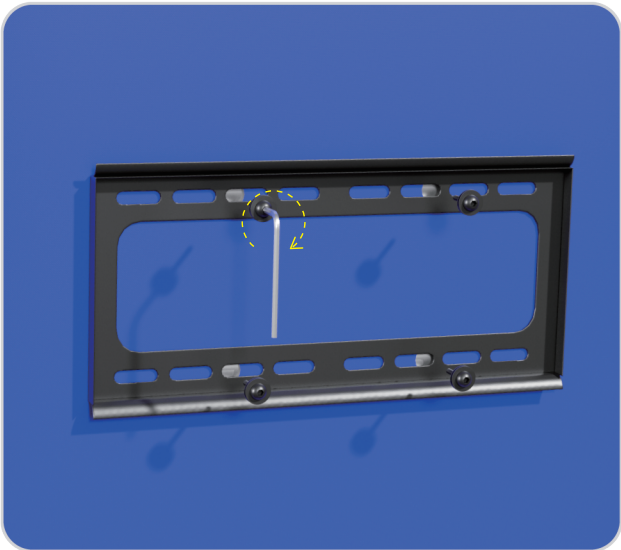

Remove the original base from both display stands.

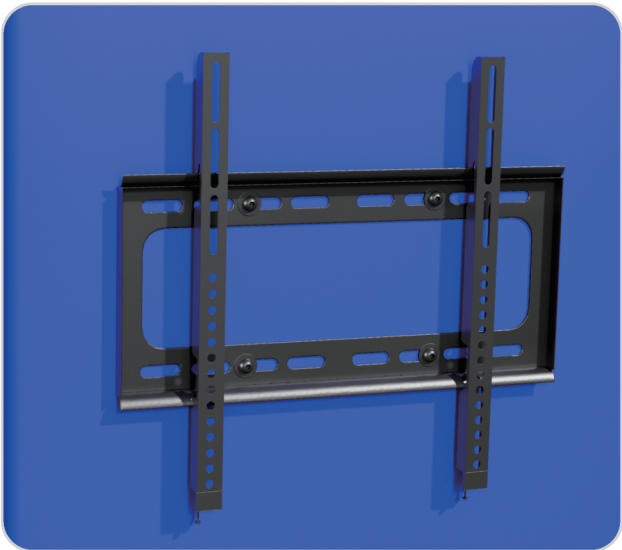

Align the stands side by side. Secure them to the modular table kit's base using screws.

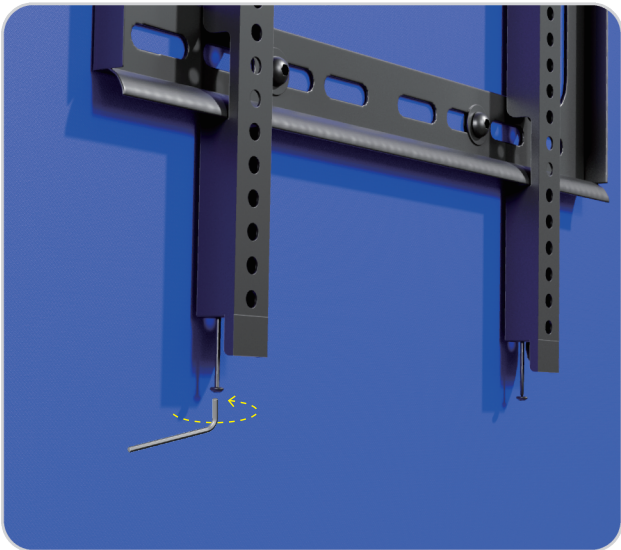

TV Rack Installation

Secure the wall plate to the shelf with screws. Pre-drilled holes are provided at the corresponding positions on the graphic.

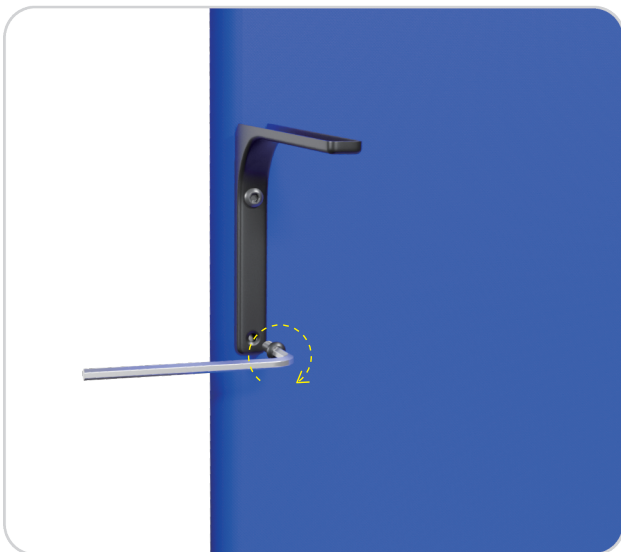

Attach the two display mounting brackets to the wall plate.

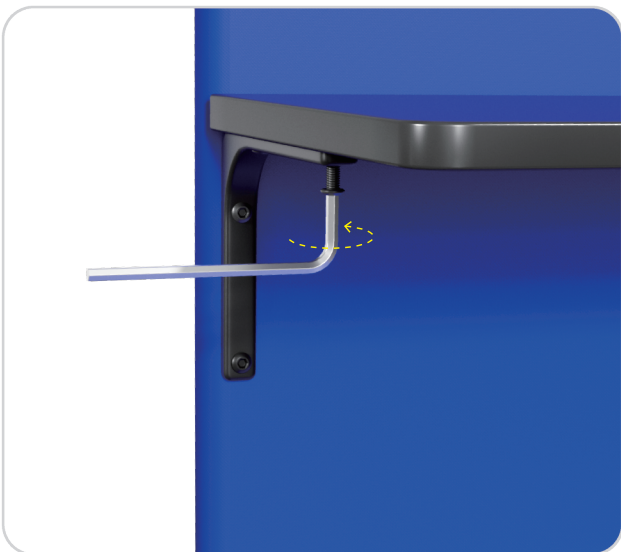

Use a wrench to tighten the fixing screws of the brackets. The TV rack installation is now complete.

Shelf Board Installation

Attach the base bracket of the shelf board to the shelf. Pre-drilled holes are provided at the corresponding positions on the graphic.

Then, fasten the shelf board to the base bracket with screws.

Install the other shelf board using the same method.
